REHUBS INVITES INDUSTRY LEADERS TO HELP SHAPE THE CONFERENCE PROGRAMME AT TEXTILES RECYCLING EXPO 2027 Brussels, 3rd November 2026 - ReHubs is proud to continue its collaboration with Textiles Recycling Expo as the Structural Partner for the third consecutive year, reinforcing its commitment to bringing together the organisations, expertise and solutions needed to scale textile-to-textile recycling across Europe.

As preparations begin for the 2027 edition in Brussels, ReHubs is calling on organisations across the textile value chain to contribute their expertise and help shape a conference programme that reflects the industry's most important challenges, innovations and opportunities.

Béatrice Moureaux, recently appointed CEO of ReHubs, sees the Textiles Recycling Expo as an important opportunity to bring the industry's different perspectives together and accelerate progress towards commercially viable circularity.

“Europe has made significant progress in developing textile recycling technologies, but innovation alone will not deliver circularity at scale. We need to address the economic and structural barriers that are preventing these solutions from becoming commercially viable. Textiles Recycling Expo provides an important platform to bring the entire value chain together, challenge existing thinking and share practical solutions. ”

Through its continued partnership with the Expo, ReHubs aims to encourage dialogue across the value chain and help ensure that the conference reflects both the challenges facing the sector and the practical opportunities for collective progress.

The Call for Speakers is now open, offering experts the opportunity to present their research, technologies, case studies and insights to a highly engaged audience of recycling professionals, brands, manufacturers, policymakers and investors.

Alongside the conference, entries for the Textiles Recycling Awards are now open. With **six categories**, **free entry**, and a live awards ceremony held in the conference theatre during the event, the awards provide an excellent opportunity to showcase achievements and gain industry recognition.

Companies looking to raise their profile can also exhibit at the event. With **more than 100 exhibitors already booked**, stand availability is becoming increasingly limited, making early booking essential.

ReHubs looks forward to seeing the wider textile recycling community represented across the conference programme, awards and exhibition floor as the industry comes together to drive textile circularity forward.

About ReHubs

ReHubs is a synergy-driven alliance dedicated to scaling up textile-to-textile recycling and boosting the adoption of recycled fibres. With a mission to recycle 2.7 million tons of textile waste in Europe by 2035, ReHubs unites stakeholders from across the value chain from collection/sorting, pre-treatment to recycling, yarn spinning, fabric manufacturing, and brands to build a future where textile waste is recycled instead of being incinerated or landfilled. ReHubs strategy and tactical action plan, published in September 2025, titled 'ReHubs: Breaking the Supply-Demand Deadlock' outlines how ReHubs aims to break the supply-demand deadlock to industrialise textile-to-textile recycling by 2035.

About AMI

AMI is a leading organizer of international events for the recycling market. These include the Textiles Recycling Expos taking place in Europe and the USA, as well as the AMI Plastics Recycling World Expo in Cleveland, Ohio. AMI also offers a range of conferences focused on various aspects of mechanical and chemical recycling both in Europe and the USA. The company also publishes the magazines TextilesLoop and Plastics Recycling World.
